Note: If the article is presented as part of the thesis or project work or as a paper, provided that it has not been published, an explanation should be made in this section as footnotes.

information about the parts of the study, its equivalence in scientific literature, the importance of the research, the research problem and objectives should be detailed in the introduction. The basis of the research subject, summary information about the parts of the study, its equivalence in scientific literature, the importance of the research, the research problem and objectives should be detailed in the introduction.

Method

The type of research, research group, data collection tools, validity and reliability, data collection techniques, analysis of the data should be detailed in the method sec

Research Model

Text. Text.

Study Group

The research group of your study should be given as detailed as possible. In the second level titles, the first letters of the words should be uppercase. The text after the second level title should continue from the bottom line.

Data Collection Tools

Career adaptability scale. Validity and reliability information regarding the original and adaptation studies of the scale should be presented. You should also report the reliability coefficient in your study. After the third level titles, the text should be continued on the dot topics.

Process

Your data collection process should be written in this section.

Data Analysis

Information on the analysis of the data should be written in detail in this section.

About Authors

First Author: Mustafa Zafer BALBAĞ is a member of Eskişehir Osmangazi University. He works at the Faculty of Education. He is currently working at the Mathematics and Science Education Department. He completed his doctorate at Eskişehir Osmangazi University and his subject is on Physics. He mainly works in the fields of Science and Physics Education.

Second Author: The authors should introduce themselves in the same format, respectively.

Third Author: The authors should introduce themselves in the same format, respectively.

Conflict of Interest

If there is a conflict of interest, write it down. Otherwise, “it has been reported by the authors that there is no conflict of interest.” Add the phrase.

Funding

If the fund is received (project, etc.), please indicate the supporting institution and project number. If no funds were received, "No funding was received." Add the phrase.

Ethical Standards

Indicate if there is ethics committee approval. Otherwise, by stating that you have carried out the research within the framework of the Helsinki Declaration; the participants are volunteers, informed consent is obtained, etc. Indicate whatever measures are taken regarding ethics.

ORCID

Respectively write the ORCID of the authors, as in the example below.

Ahmet Kara  <https://orcid.org/0000-0002-1155-619X>
